Lighting connector, 224 Series, gray

This lighting connector (item number 224-201) streamlines wire connections, making them both quick and easy. WAGO's 224 Series lighting connectors make connecting lights a breeze—and completely safe. Light up any space quickly and reliably. If you need to connect a fine-stranded conductor with a solid conductor, choose the 224 Series for performance you can trust. Strip lengths must be between 9 and 11 mm when connecting conductors to this lighting connector. Our splicing connector is rated for 400 V and is designed for use with a rated current of up to 24 A. As such, it is suitable for high-load applications. This product features conductor terminals and utilizes CAGE CLAMP®. Our trusted universal connection known as CAGE CLAMP® is the industry standard when it comes to connection technology and electrical interconnections. The item's dimensions are (8 x 15.5 x 42) mm (width x height x depth). This lighting connector is suitable for conductor cross sections ranging from 0.5 mm² to 2.5 mm².

Connectable conductor materials (note)	**Terminating Aluminum Conductors (not for use in North America)** WAGO Spring-Clamp Terminal Blocks are also suitable for solid aluminum conductors up to 4 mm²/12 AWG if WAGO Aluminum Contact Paste 249-130 is used for termination. Aluminum Contact Paste Advantages: ▪ Automatically destroys the oxide film during clamping. ▪ Prevents fresh oxidation at the clamping point. ▪ Prevents electrolytic corrosion between aluminum and copper conductors (in the same terminal block). ▪ Provides long-term protection against corrosion. Using terminal blocks with CAGE CLAMP® Spring Pressure Connection Technology, **aluminum conductors must first be cleaned with a blade** and then immediately inserted into the clamping units filled with aluminum contact paste. It is also possible to apply WAGO Aluminum Contact Paste **additionally** on the whole surface of the aluminum conductor before termination. Please note that the nominal currents must be adapted to the reduced conductivity of the aluminum conductors:: 2.5 mm² = 16 A 4 mm² = 22 A
